EXPERIENCE

Codiga

Remote, USA

Software Engineer (Contract)

Feb 2022 – Present

- Reduced build times by 2x by writing deployment scripts and configuring lerna workspace in monorepo.
- Decreased the build size by 3x, by building Component Library using Chakra UI, Rollup and Typescript.
- Number of adoptions increased by 1.5x by advising to Developer Marketing Team.

Affinidi by Temasek

Singapore

Software Engineering Intern

August 2021 – Present

- Create and engineer developer adoption projects and generate 80% adoptions on Affinidi APIs and SDKs.
- Research on system design and develop the Affinidi Developer Portal to production, serving over 100,000 of developers.
- Improve the existing coupled Authentication to decoupled Authentication for the internal PoCs and projects, which results in increased code re-usability and optimize bundle by removing 10,000 Lines of Code(LOC).

Major League Hacking

Remote

Engineering Fellow

January 2021 – April 2021

- Developed the CryptoDrive using Web3, Solidity and React, gained 100 of users in first release.
- Researched on decentralized networks and developed a decentralized file storage service.
- Awarded as Fellow from Major League Hacking(150 Fellows from 40,000) Received winning prize for CryptoDrive as a global winner.

PROJECTS

Simulated Linux on browser.[React, Data Structures]

December 2020

- **Problem:** Quick no-setup simulated browser based Linux Shell, to make beginners aware in the university.
- **Solution:**Used to empower 5000+ beginners to get started with Linux Commands, via Web Terminal, a simulated terminal on browser. Developed core file service system using Tree Data Structure

CertiGen(Mentored under Ronak Shakuja, SWE Microsoft) [NodeJS, JIMP and Postman]

October 2020

- **Problem:** Issuing Developer Event Certificates for Microsoft Student Ambassador's Community
- **Solution:**A devtool for Microsoft Student Ambassadors, to generate certificates in seconds using Postman.
- Actively used by 1000+ Student Ambassadors, for their events and quick certificate generations.

TECHNICAL SKILLS

Languages(Proficient): Typescript, Javascript, Node.js

Frameworks(Proficient): NextJS, PostgreSQL, TypeORM, React, Node.js, NestJS, AWS Cognito, AsyncAPI Specification

Developer Tools(Proficient): Terraform, AWS(Lambda, Cognito, SES, Route53, Elastic) , Docker, AsyncAPI, OpenAPI, Postman, Google Cloud(Deployment and Monitoring)

Languages(Familiar): Terraform, Go, Python, Solidity, SQL, gRPC

Libraries: BabelJS, Kubernetes K9S, React-Router, TypeORM, Newman, Material UI, Tailwind

AWARDS AND VOLUNTEER EXPERIENCE

- **AsyncAPI 2022 Mentee by Linux Foundation**
- **Guest Speaker at Carnegie Mellon University, UC Berkeley and Georgia Tech:** Presented by first international talk on API Designs and how one can securely serve their machine learning models.
- **API Hacks Organizer :** Organizer of API Hacks with support of Postman to help 2000+ developers to build developer tools, productivity tools using APIs and nurture open source culture among them.
- **Global Hackathon Winner at MLH Fellowship for CryptoDrive**
- **Other Auspicious Titles Awarded:** Official Postman Conference Speaker(Featured on Postman Youtube), Most Valuable Professional(MVP) at SAWO Labs, Gold Microsoft Student Ambassador(200 Golds Globally) .

EDUCATION

Chandigarh University

Mohali, Punjab

Senior,B.E in Computer Science and Engineering

August 2018 – Expected July. 2022
